OpenWorks supports Puget Sound Blood Center

Seattle, Washington (January 2008) – OpenWorks, a leader in the facility services industry, was recently awarded its tenth Puget Sound Blood Center location. OpenWorks partnership with the Blood Center started back in 2004.

According to Christina Arner, Washington Regional Director, “The key success factor in expanding this relationship has been our experienced and dedicated franchise owners who really take pride and ownership in their business and in the sites they service. Another key driver is the direct level of involvement with the customer from the franchise owner, District Manager, Regional Director and Customer Service support at OpenWorks. We have built a level of trust and confidence with the customer through this involvement and they know that we are the, “go to”, company for all their commercial cleaning needs.

About Puget Sound Blood Center

Formed in 1944, the Puget Sound Blood Center is a not-for-profit blood and tissue bank that serves about 70 hospitals and clinics in western Washington State. They collect and process donated blood through a dozen different donation centers. As well as register bone marrow donors, provide testing and training services to patients with hemophilia, and collect cord blood for use in stem cell transplantation. Additionally, the center is the leading research organization in the areas of transfusion and transplantation medicine.

About OpenWorks: Give Your Facility The Works

Founded in 1983, OpenWorks is a full service commercial cleaning company servicing 1,500 facilities and over 30 million square feet of commercial and industrial space nationwide. We are an innovative and progressive organization that makes buildings better and safer places to work – fulfilling an important function for businesses such as the Puget Sound Blood Centers.

For a cleaner, more productive, work environment, let OpenWorks *give your facility the works*. For more information, visit the OpenWorks website at www.OpenWorksWeb.com
